

Matheus Pereira

Full Stack Software Engineer | React | TypeScript | JavaScript | Node.js

matheuspereira6464@gmail.com | +55 92 992138870 | [\(6\) Matheus Pereira | LinkedIn](#) | Amazonas, Brazil

Summary

Computer Engineer with a solid background in coordinating R&D (Research, Development, and Innovation) projects and full stack software development. Experienced in building scalable technology solutions and leading multidisciplinary teams using Agile methodologies. Proficient in systems architecture and modern web technologies, combining strategic vision with technical excellence to optimize processes and deliver high-performance results in global environments.

Experience

Software Project Lead

ITEGAM | Manaus, Brazil (On-site)

06/2025 – Present

Led Research, Development, and Innovation (R&D&I) software projects, overseeing the planning, execution, and delivery of technology solutions aligned with business and industry requirements. Managed multidisciplinary teams, defined project scope, timelines, and performance metrics, ensuring technical excellence, on-time delivery, and adherence to quality standards.

- Collaborated closely with stakeholders to drive digital transformation initiatives, optimize development processes, and deliver scalable, high-performance software solutions using Agile methodologies and modern web technologies.

Skills: TypeScript, JavaScript, Vue.js, React, Node.js, SQL, Git, Agile Methodologies (Scrum).

Full Stack Software Engineer

ITEGAM | Manaus, Brazil (On-site)

01/2025 – Present

Designed, developed, and maintained scalable web applications, delivering end-to-end software solutions that met business and industry requirements. Built responsive front-end interfaces and robust back-end services while integrating APIs and databases to ensure high performance, reliability, and maintainability.

- *Collaborated with cross-functional teams throughout the software development lifecycle, implementing new features, optimizing existing applications, and following Agile methodologies and best engineering practices to deliver high-quality products.*

Skills: TypeScript, JavaScript, Vue.js, React, Node.js, SQL, REST APIs, Git, Docker.

IT Support & Systems Intern

VIA CERTA | Manaus, Brazil (On-site)

01/2023 – 06/2023

Provided technical support and managed internal business systems, contributing to the efficiency of logistics operations and information management. Maintained inventory and warehouse management systems, ensuring data accuracy and operational continuity.

- *Managed SQL database records, performed data maintenance and validation, and supported internal users by troubleshooting system issues. Collaborated with cross-functional teams to optimize operational processes, improve data organization, and enhance the reliability of internal IT systems.*

Skills: Microsoft SQL Server, SQL, Windows Server, IT Support, System Administration, Database Management, Troubleshooting, Process Optimization.

Education

Advanced English Program – ICBEU, Brazil (Graduated in 2018)
Bachelor of Computer Engineering – FAMETRO, Brazil (2019 – 2024)

Languages

English: Full professional proficiency

Portuguese: Native

Skills

TypeScript | JavaScript | React | Vue.js | Node.js | Python | HTML5 | CSS3 | SQL | PostgreSQL | MongoDB | REST APIs | Git | Docker | AWS | CI/CD | Microservices | Software Architecture | Design Patterns | Agile (Scrum) | Unit Testing | Full Stack Development | System Design | Jira | Problem Solving | Docker

Additional Information

- Fluent in Portuguese and Advanced English.
- Open to remote, hybrid, and international opportunities.
- Eligible to collaborate with distributed and multicultural teams.
- Research and Development (R&D) project leadership experience.
- Software registered with the Brazilian National Institute of Industrial Property (INPI).
- Strong background in Agile methodologies (Scrum) and collaborative software development.
- Passionate about software architecture, scalable applications, and continuous learning.
